

# CS 5473 Computer Security

Winter, 2011

## Some information about Team Project:

Instructor: Dr. Ruizhong Wei (AT 5021, Ex. 8227)

E-mail: ruizhong.wei@lakeheadu.ca

## Project Documentation:

Each student should keep records of your team project activities so that the instructor can evaluate your work for the team project. At the end of this term, each student should hand in the following documents.

### 1. Activity record:

Each student should keep a journal to record your activities for the team project. The records can indicate when and how you worked for the project. The team activities should also be recorded in the journal. You may write down anything related to the project. For example:

Jan 25, 2011: download Linus OS from <http://www.ubuntu.com/> and made a CD.

Read Ubuntu Guide and install documentation from:

<https://help.ubuntu.com/10.10/serverguide/C/index.html>

<https://help.ubuntu.com/10.10/installation-guide/index.html>

Jan 26, 2011: try to install Ubuntu OS to my own laptop as a virtual OS.

Found problems: .....

The problem is solved by .....

I found this paper "....." is useful for the project.

Jan 28, 2011, afternoon: Team meeting discussed .....

... ..

### 2. Team report:

Each team should hand in a team report for the project which includes the following:

- A brief description of your project design, emphasize the security requirements and the design features for these requirement.
- A security check list for your system and the results of perform the checks. Any improvement made after the checks.
- How your team check the security of the other team's system. Any weakness found for their system.
- Anything else that your team think it is worth to include.
